

MENNONITE COLLEGE OF NURSING
AT ILLINOIS STATE UNIVERSITY
Family Nurse Practitioner Sequence
SELECTED PROCEDURES AND SKILLS FOR CLINICAL PRACTICE

These skills and techniques are selected components of FNP practice. Students are expected to gain experience with these skills by observation and/or demonstration during clinical practicum in conjunction with their preceptors. Please record interventions and procedures in your Encounter Log. The Log will be used to assist faculty and preceptors to plan and document your practicum.

Laboratory Procedures

- A. Hematocrit
- B. Hemoglobin
- C. Phlebotomy
- D. Urinalysis
- E. Common wound cultures
- F. Blood glucose monitoring device
- G. Pinworm prep
- H. Throat culture
- I. Pregnancy test
- J. Strep screen

- K. Gram stain

Miscellaneous Procedures

- A. Woods light
- B. Visual acuity
- C. Fluorescein staining of eyes
- D. Tonometry
- E. Tympanometry
- F. Audiometry
- G. Electrocardiogram (12 lead)
- H. Peak Flow Evaluation tests
- I. KOH prep of skin lesions
- J. Developmental screening tests
(DDST-II)
(Mullen Scales of Early Learning; NCAST II)
- K. Interpretation of selected
Radiologic tests:
chest x-ray
skeletal x-rays
abdominal x-rays
other (indicate)

Genital / Rectal Examination

- A. Pap smear
- B. GC culture (male/female)
- C. Chlamydia culture (male/female)
- D. Saline wet mount

- E. KOH prep
- F. Hemocult slide
- G. Herpes (viral) culture

Therapeutic Interventions

- A. Wound care
- B. Cerumen removal
- C. PPD interpretation and Tine tests
- D. Liquid nitrogen, triacetic acid, or podophyllin application
- E. Diaphragm fitting
- F. Suture removal
- G. Immunizations
